

VETERANS SERVICES

MISSION

The Philanthropy Roundtable launched its Veterans Program in 2012 to help donors make their giving for veterans more strategic and consequential — ultimately empowering and equipping veterans as they transition from military service to civilian life.

GUIDING PRINCIPLES

We believe that veterans are an asset to American life after their service.

We are committed to philanthropy that ameliorates any challenges of military service and empowers veteran success after service.

We see recent veterans as a new “greatest generation” with enormous potential for leadership in our society.

TESTIMONIAL

“We reached out to The Philanthropy Roundtable for support in hosting a symposium focused on the skills gap and how corporate and private philanthropy can have an impact. The Roundtable...guided our planning team in creating and delivering a first class symposium. Through thoughtful program development advice and making key introductions, The Philanthropy Roundtable enabled us to develop a powerful agenda and an impactful two day meeting. We are now better equipped to mobilize a philanthropic community towards closing the skills gap and better preparing our transitioning veterans and opportunity youth for meaningful careers.”
